Light duty outdoor braid is made from 100% nylon. Nylon is an extremely strong fibre yet reasonably light in weight, for this reason it is used in areas such as high excess work and climbing. This product is specially constructed in that it is a double braid where the braided sheath protects a braided core and that makes this rope extremely durable and strong. This rope can be used for e.g swings, dropping pumps down boreholes, supporting structures, heavy duty tie downs and towing etc.
